Forecast for Wednesday 06 Oct 2021

Weather: Dry with long clear spells through the early hours. Then a sunny morning but cloud above the summits increasing from the west towards midday to leave a generally cloudy afternoon. Outbreaks of rain reach western fells towards the end of the afternoon and then spread east through the evening.

Chance of cloud free mountain/hill tops above 800m: 100% falling to around 60% in the far west towards the end of the afternoon and near zero through the evening

Visibility: Occasional or periods of cloud developing above 450-600m towards the end of the afternoon in the far west and becoming more widespread through the evening. Otherwise visibility very good with some decent panoramic views of surrounding fells and lakes, especially through the morning, falling to several kilometres in rain later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts around 50mph in early hours with significant chill over higher fells. Valley temperatures locally around 4 Celsius at dawn.

Forecast for Thursday 07 Oct 2021

Weather: Cloudy with outbreaks of rain, most persistent and occasionally heavy in the south and west. Best chance of drier brighter conditions expected over northeastern fells.

Maximum wind: Southerly or southwesterly 25-30mph with gusts around 45mph over ridges and summits.

Chance of cloud free mountain/hill tops above 800m: Near zero generally but around 40% in northeast

Visibility: Periods or persistent cloud above about 450-600m, occasionally 300m over southern and western fells, but at times more occasional above 600m in the northeast. Otherwise visibility good, or in northeast occasionally very good, falling to several kilometres in rain.

Temperature: **Valleys:** Around plus 12 rising to plus 15 Celsius
At 800m: Plus 9 or 10 Celsius
Freezing level: Well above the summits
